SKILLS

- Embedded Systems
- KiCad
- Proteus
- Software Development
- İOS Devolopment
- Web Devolopment
- Tia Portal
- Autocad
- 3D Modeling

LANGUAGES

- English (Intermediate)

REFERENCE

- Dr. Osman Özer
(osman.ozer@selcuk.edu.tr)
- Prof. Dr. Hasan Erdiñç Koçer
(ekocer@selcuk.edu.tr)

PROFILE

I am a senior Electrical and Electronics Engineering student at Selcuk University, deeply passionate about bridging the gap between hardware and software. I actively develop projects specializing in embedded systems and PCB design.

WORK EXPERIENCE

Ditetra İnovasyon

JUNE 2025 - JULY 2025

Intern Engineer

- Worked in the production unit focusing on the assembly and testing of high-end LED lighting solutions. Contributed to the assembly, hardware testing, and quality control processes of smart home automation systems, integrated smart devices, and their associated electronic control and driver boards.

Golda Gıda

JULY 2025 - AUGUST 2025

Intern Engineer

- Took part in the maintenance and monitoring processes of industrial food processing machines, energy compensation panels, and solar (PV) systems. Additionally, performed testing, fault detection, and component-level repair operations for electronic control and driver boards used in elevator and door automation systems.

EDUCATION

B.S. in Electrical and Electronics Engineering

Selçuk University

KEY PROJECTS

- 4-Axis Smart Robot Arm
- STM32 PID Ball Balancer
- STM32-Based 3-Phase BLDC Motor Controller with Current & Voltage Sensing (<https://github.com/btdelen/stm32-bldc-motor-driver>)
- STM32-Powered Multi-Axis Motion Control Board for CNC & 3D Printers (<https://github.com/btdelen/stm32-cnc-mainboard>)
